Immedia
Manual Transfer System

etac®

Etac creates possibilities

Etac's core values are Scandinavian design, innovation and technology. For more than forty years, Etac has developed products and services that creates possibilities for users and caregivers. During the last decade Etac has grown the product portfolio through several acquisitions.

Today we can offer a wide range of solutions for mobility with manual and power wheelchairs, advanced seating solutions, solutions for patient transfer and vital solutions needed for everyday life including classic products for bathing and toilet. We also provide a world-class state of the art range of solutions for pediatric use. All our products are developed in close cooperation with rehab professionals, industrial designers and users. The result is ergonomic design and high quality products that are unique in the market.

DURABILITY AND QUALITY

All our products have one thing in common – they are the best in terms of quality, simplicity, function, reliability and design that the market has to offer. Our commitment to provide the best in quality and innovation has positioned Etac as the brand of today and of the future.

SAFETY IN EVERY DETAIL

Every product detail is designed to ensure well-being and safety. Etac provides safe solutions, which give a high sense of comfort and functionality. We strive to retain the cutting edge in design and function. Our vision is that everyone should be able to live a free and independent life and pursue their dreams regardless of any physical circumstances.

Welcome to the world of Etac, where Immedia is an important part!

Torben Helbo
CEO, Etac AB

"All our products are developed in close cooperation with rehab professionals, industrial designers and users.

CREATING POSSIBILITIES WORLDWIDE

The Etac Group has subsidiaries in 10 countries and distributors in more than 45 countries spread over most of the globe, ensuring personal support – even after the product has been delivered.

ENVIRONMENTAL CONSIDERATION

We strive to keep our production as environmentally friendly as possible. Materials are selected and products designed with recycling in mind. We aim to minimize use of materials and to optimise packaging for shipping and handling.

ETAC EDUCATION

Learn more about our products and improve your assessment skills! We provide product training, clinical applications and seminars related to our product ranges. Our educational managers are product specialists with long clinical experience.

For more information visit etac.com or contact your local Etac representative.

Quality provides security

Caregiving takes place in a large variety of environments. Private homes, rehab clinics, nursing homes and acute care hospitals are some examples. We are convinced that the sense of security and well-being makes care more effective. It also saves time in terms of work and provides a better communication between care recipient and caregiver.

FUNCTION THAT FACILITATES

In the 70's Etac* became the first in the field to cooperate with industrial designers to reform products for home care. Functional products that facilitate bathroom activities took form and products for kitchen and dressing shortly followed. Ten years later, a Swedish pioneer, using a wheelchair himself, presented a new innovative generation of wheelchairs within Etac that soon became a core part of our product portfolio. Since 2004 Etac has grown through several acquisitions, HandPro, Immedia, Molift and the latest acquisition in 2011 being R82. All these companies share the history of being founded by entrepreneurs with a strong product passion. All our product developers today are highly comitted to the same spirit.

HIGH TECHNOLOGY FOR THE CARE FIELD

Today we have both manual and power wheelchairs with high technology functions. Etac has also included mechanical and manual transfer products which are very much appreciated and important in the care field. We offer a large assortment of pediatric products and a wide range of accessoires. For more specific information of our product ranges see page 54–55 and etac.com.

WINNING DESIGN FOR FOUR DECADES

Etac products are developed in close cooperation with industrial designers, rehab staff and users. This has resulted in an ergonomic design and quality that is unique in the market. A distinguished confirmation that we have succeeded are all design awards we have received, both Scandinavian and international.

ETAC CREATES POSSIBILITIES SINCE 1973

2013 Etac launches Molift Air, Molift RgoSlings, Etac Cross 5 and Etac Relax.
2011 Etac becomes fully owned by Nordstjernan.
2011 Etac aquires R82, worldleader of producing technical aids and appliances for disabled children.
2010 Etac aquires Molift, creator of the first battery-powered patient lift in the world.
2008 Etac aquires Immedia, manufacturer of manual transfer products.
2004 Etac aquires HandPro, manufacturer of the powerchair Balder.
1992 Etac launches Cross, the first multifunctional cross folding wheelchair in the world.
1985 Etac launches Nova, the first four wheeled walker with front wheels swivel in the world.
1973 *RFSU Rehab, later renamed Etac, is founded.

Etac is today an international company with sales companies and distributors all over the world. Nordstjernan is the owner of Etac. It is a family-owned investment company with a strategy of focusing on long-term investments.

Welcome to Immedia transfer solutions!

Immedia manual transfer product range ensures safe and comfortable transfers. The smooth products reduce friction and facilitate weight shifts. They also help encourage natural movement patterns and the transfer can be performed with ease and dignity for both the recipient and caregiver.

The Immedia Butterfly is a transferboard, especially designed for bariatric users. The unique Glidewing Butterfly offers a very easy sitting transfer.

The Immedia manual transfer products are developed according to the principles that rely on the natural pattern of movement, weight transfer, knowledge about friction points and ethics. The idea behind the products is that they must be simple to use for both recipient and caregiver.

Immedia SatinSheet System is a flexible in-bed system with a wide range of options for users with different needs.

Learn more about careful transfer

The idea behind the products is that they must be simple to use for both patient and user. To help you get the most out of our products, we provide educational on-line movies. Just scan the QR-code.

Etac Education

Our products are developed in close dialogue with a large group of professionals such as; physiotherapists, nurses, educational staff in addition to users. I believe it is through the exchange of experiences that we can develop and offer the best products.

PETRA AXELSSON, PHYSIOTHERAPIST, ETAC SWEDEN

Step-by-step tutorials

Although our products are easy to use, its not always immediately obvious how to handle them. Our step-by-step tutorials will explain.

1. Place the Immedia Butterfly *close to the users seat, and slide the Glidewing under one seat bone. When the user is ready to transfer, she moves her weight towards the board.*

2. If possible, *the user holds on to the opposite armrest when she starts to slide towards the wheelchair. Use the Immedia Pediturn to ease turning.*

3. When the transfer *is complete, remove the Immedia Butterfly and engage wheelchair armrests and legrests.*

From problem solving to functional products

The story of Immedia started in the mid 1980's when a Danish pioneer saw a need for manual transfer products after being hospitalized for a long period due to an accident. At the same time he was watching his elderly parents becoming more dependent on help from others. Facing these difficulties he realised the problems surrounding manual transfers and came up with a vision to improve the quality of life for both users and carers.

Which is your next move?

The aim of these symbols is to help you to quickly find the solutions that you need.

POSITIONING – Horizontal

Systems and solutions for horizontal positioning, turning, pressure care and moving higher up in bed.

Immedia **SatinSheet System**

A COMPLETE IN-BED SYSTEM FOR TURNING AND POSITIONING

User-friendly moving and handling solutions are critical to ensure safe working environments. With our in-bed Immedia SatinSheet System, no application or removal of the product is required.

Immedia SatinSheet System reduces friction between the user and the bed. By reducing friction, two major challenges are addressed and decreased:

- The workload on the caregivers, that reduces work-related injuries.
- The shear forces on the patient, that reduces the risk of pressure sores.

Learn more …

… about how to use the SatinSheet System. Our new animated film SatinSheet System gives you useful instructions for your daily work.

Immedia **SatinSheet System**

A COMPLETE IN-BED SYSTEM FOR TURNING AND POSITIONING

The Immedia SatinSheet System is developed to meet different levels of user's needs from slightly reduced/impaired mobility to a dependent user. We define user's needs in three categories; independent user, partly dependent user and dependent user.

Independent user

Immedia SatinSheet System 2Direction helps Independent users to turn in bed. This sheet has a low friction satin area in the centre that allows movement from side to side. Immedia SatinSheet System for Independent users is available in three sizes.

Partly dependent user

Partly dependent users require limited help. They can use their arm/arms, leg/legs, lift their head, but have difficulty in moving their torso. With an additional SatinSheet DrawSheet, one or two caregivers can reposition a patient with minimal effort.

Dependent user

The Dependent user needs help for all repositioning in bed. The SatinSheet 2D Midi or Maxi, in combination with SatinSheet 4Direction, is a system that allows two caregivers to reposition the user in all directions with minimum effort. The SatinSheet System also helps to prevent decubitus, because it allows the user to make micro-movements.

RECOMMENDED USE!

1. With the 4Direction, you can pull the patient gently higher in bed with minimum effort. Its easy to use the in-bed system since it stays in the bed.

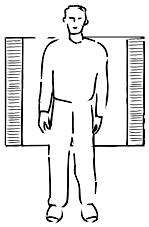
2. Repositioning to the side in bed is done with one caregiver pulling and the other pushing.

TIP!

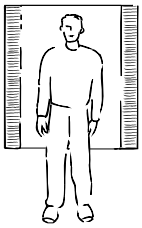
To avoid rotation of the back, ensure the same side foot and hand are in the forward position ie right hand, right leg, when pushing or pulling a user in the bed.

Positioning the SatinSheet

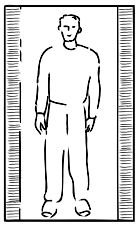
The sketches below show how to posititon the user on the various SatinSheet versions.



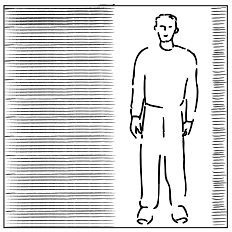
Mini



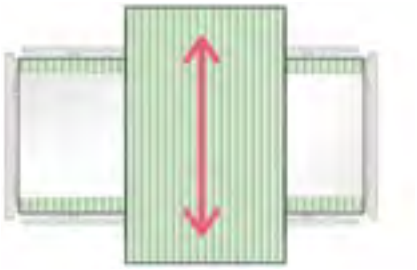
Midi



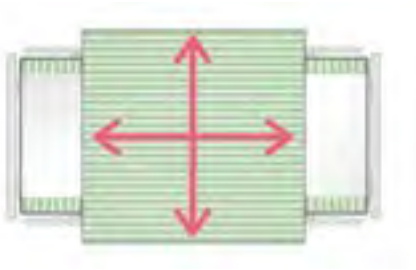
Maxi



Double



The combination of a SatinSheet 2Direction with a Drawsheet allows the caregiver to turn the user in bed. It reduces friction in 2 directions.



The combination of a SatinSheet System 2Direction base sheet with a SatinSheet 4Direction creates a system that reduces friction in 4 directions.

Recommended combinations of 2Direction SatinSheet and DrawSheet and SatinSheet 4Direction

Additional reasons to choose the Immedia SatinSheet System

- Unique material: low friction when the user moves laterally and high friction by up/down motion to prevent the user from sliding down in bed.
- High friction along the bed.
- Stripes indicates glide direction.
- Always available in the bed.
- Meets various levels of need from an independent to an entirely dependent user.

INTENDED USE

- In bed system, whether independent or assisted user
- Turning in bed
- Positioning in bed
- Moving higher up in bed

Immedia **In2Sheet**

INCONTINENCE PAD WITH SATIN

Immedia In2Sheet is an incontinence pad with a low friction backside. It is used directly on top of a cotton bed sheet, with the satin low friction surface down. This reduces friction side-to-side, and is therefore suitable for turning an incontinent user with reduced mobility. In2Sheet has handles along the sides for better grip.

Immedia In2Sheet low friction underside facilitates turning in bed.

INTENDED USE

- Incontinent user with reduced mobility
- Turning in bed

Immedia 4WayGlide System

IN-BED SYSTEM FOR USERS WITH LIMITED MOBILITY

The Immedia 4WayGlide System is an in-bed system for severely immobile patients. It is ideal for patients with reduced mobility or with pain or decubitus issues. The main advantage with this in-bed system is that it can remain in bed at all times. No application or removal of the slide sheets is necessary. Our 4WayGlide System always consists of two parts: a nylon sheet attached to the mattress and a Glide Mattress. The combination of the underside of the Glide Mattress and the nylon sheet provides an extremely low friction surface for movement in all directions, which facilitates positioning and turning, whether manual or with support of a hoist.

The top mattress of the 4WayGlide is equipped with handles that can be attached to a hoist to turn heavy or passive patients.

INTENDED USE

- In-bed system, user with reduced mobility
- In-bed system, heavy user or user with pain or pressure ulcer
- Turning
- Positioning
- Support horizontal transfer
- Can be used with support of a hoist

The Lock On Sheet System (LPL)

A major challenge with an in-bed system is to prevent the patient from unintentionally sliding down, especially when the bed is profiled. The Immedia 4WayGlide System has the unique Lock On Sheet System. This means that the extremely low friction material around the seat easily can be removed to prevent the patient from sliding down. Moreover you can easily put it back on when she has to be repositioned.

RECOMMENDED USE!

1. With the unique Lock on Sheet System, the low friction material can be removed and allow the patient to sit comfortably without sliding down.

2. When the patient has to be repositioned, deactivate the Lock On Sheet System to enable low friction under the seat.

3. The Immedia 4WayGlide System can now be used to reposition the patient higher in bed.

4. Sideways repositioning is also easily done with one or two caregivers.

TIP!

Low friction material allows the upper body to slide when the head end of the bed is raised and shearing is avoided.

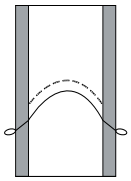
Options for the 4WayGlide System

The 4WayGlide System consists of two parts: a nylon sheet and a Glide Mattress. The nylon sheet is attached to the mattress and the Glide Mattress is placed on the nylon sheet.

Immedia 4WayGlide

Standard configuration of the 4WayGlide System

The standard nylon sheet has a unique Lock On Sheet function and non-slip material along the bedside.



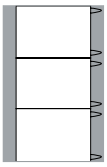
IM85/200LPLNS

The standard Glide Mattress has a cotton/polyester upper. Handles on the inside improve grip and allows attachment to a hoist.

IM140/200LPL

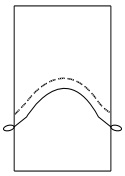
Optional Nylon Sheet

For improved flexibility, the Nylon Sheet has the Lock On Sheet function in three areas. It also features non-slip material along the bedside.



IM85/2003LPLNS

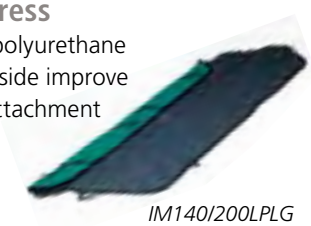
This Nylon Sheet features Lock On functionality. Non-slip material along the bedside is removed to allow transfer from the bed to another supine surface.



IM85/2003LPL

Optional Glide Mattress

The Glide Mattress has a polyurethane topside. Handles on the inside improve the hand grip and allow attachment to a hoist. The surface is wipe-clean.



IM140/200LPLG

The Immedia 4WayGlide Maxi is a alternative for large and heavy patients.

The TwinSheet Glide Mattress features an integrated incontinence pad. Handles on the inside improve hand grip and allow attachment to a hoist. It is divisible for improved personal hygiene (for further details see page 14).

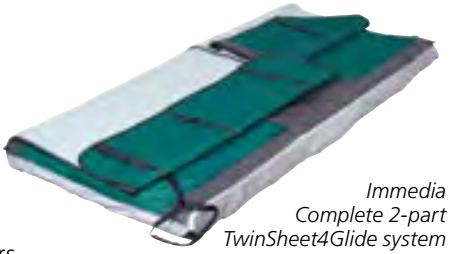
Immedia **TwinSheet**

THE IN-BED SOLUTION FOR INCONTINENT USERS

TwinSheet4Glide system

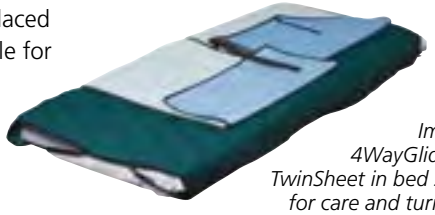
Immedia TwinSheet4Glide is a 2-part glidemattress suitable for turning and positioning of incontinent users with severely reduced mobility. Suitable also for users with dementia, or for those who feel unsafe, have brain damage, pain, pressure ulcers or are heavy. Disconnecting the lower part in this position provides better access for care of pressure ulcers, hygiene, dressing and even to change the bedding, both the lower part and the top part.



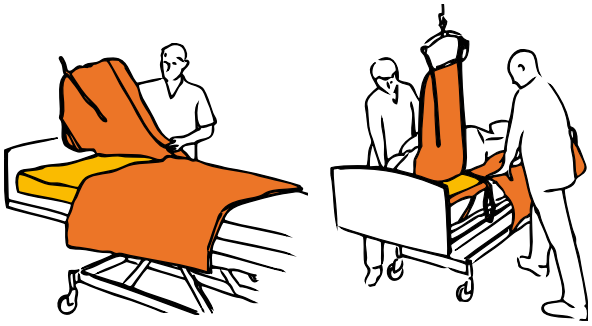
Immedia Complete 2-part TwinSheet4Glide system including nylon sheet.

Immedia TwinSheet in-bed system

Immedia TwinSheet is a 2-part incontinence pad with handles. It is placed on top of a 4WayGlide or similar in-bed systems. TwinSheet is suitable for turning heavy users with pressure ulcers, users who are difficult to turn and users who are pain sensitive. TwinSheet can be attached to a hoist for turning of the heavier user, or for maintaining the user on their side during care in bed – hygiene, pressure care, etc.



Immedia 4WayGlide with TwinSheet in bed system for care and turning of heavy incontinent users.



INTENDED USE

- Turning and positioning
- Support remaining for users in the side position
- Personal hygiene, ulcer care and dressing
- Moving higher up in bed (TwinSheet4Glide)
- Horizontal transfer (TwinSheet4Glide)
- Can be used in combination with a hoist

Immedia 4WayGlide

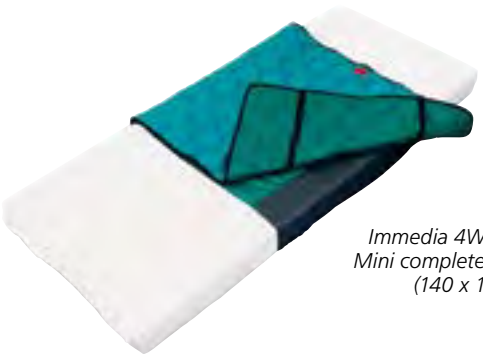
NYLON BED SYSTEM FOR INDEPENDENT OR PARTLY INDEPENDENT USERS

4WayGlide System consists of two parts; a Nylon Sheet that is fixed to the mattress and a Glide Mattress that lies on top.

4WayGlide Mini

4WayGlide Mini is a short (100 cm) in-bed system suitable for users with slightly reduced mobility, for instance in the pelvic area.

The system facilitates independent or assisted movement. The non slip material along the sides of the nylonsheets minimises the risk of the user sliding out of bed.



Immedia 4WayGlide Mini complete system (140 x 100 cm).

4WayGlide Midi

4WayGlide Midi is a short (150 cm) in-bed system suitable for heavy users with partly mobility in the legs. 4WayGlide Midi has a locking system between the nylonsheet and glidemattress and non slip material along the sides of the nylonsheet.

Immedia 4WayGlide Midi complete system (140 x 150 cm).

INTENDED USE

- In-bed system
- Turning, whether independent or assisted
- Positioning
- Moving higher up in bed
- Can be used with a hoist

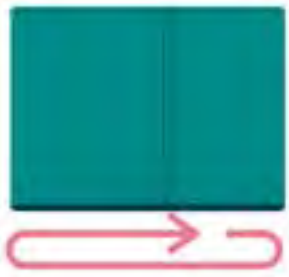
Immedia **MultiGlide**

NYLON TUBULAR SLIDE SHEET WITH HIGH-LOW FRICTION

Immedia MultiGlide is a thin tubular slide sheet with ultra low friction on the inside and high friction on the outside. The outside surface also provides a waterproof barrier. MultiGlide is suitable when there is a need to minimize friction under the pressure points, for instance when transferring and turning in bed, between bed and wheelchair, on the operating table or x-ray table.

MultiGlide is to be applied when necessary and removed after use. Immedia MultiGlide is available in several sizes. MultiGlide has a loop strap for easy storage and colour codes for differentiation. MultiGlide should always be removed after use.

Immedia MultiGlide with high friction outside ensures that it remains in place under the user during transfer and turning. Inside is ultra low friction.



Immedia MultiGlide is a thin tubular slide sheet with ultra low friction on the inside and high friction on the outside.

INTENDED USE

- Minimize friction under the pressure points
- Turning
- Positioning
- Higher up in bed
- Bed to bed transfer

Immedia **MultiGlide SG**

NYLON SLIDE SHEET WITH LOW-LOW FRICTION

Immedia MultiGlide SG is suitable for all types of situations when there is a necessity to minimize friction under pressure points. It is ultra low friction both inside and outside with the double layer minimising friction.

MultiGlide SG is easy to apply and remove, and should always to be removed after use. MultiGlide SG tubular is available in several sizes and also in a 10 meter roll that can be cut to any desired length.

Immedia MultiGlide SG roll that can be cut down to any desired length. Outside: ultra low friction, inside: ultra low friction.

Immedia MultiGlide SG low-low friction is easy to apply and remove.

Immedia MultiGlide SG tubular has a black loop strap for easy storage and differentiation. Immedia MultiGlide SG should always be removed after use.

Immedia GlideCushion

PADDED GLIDE CUSHION

Immedia GlideCushion are used for turning in bed, moving up or down a bed and transfer from bed to wheelchair. GlideCushion can be used to support independent movement or to aid assisted movement. GlideCushion is available in two variants; Immedia GlideCushion nylon top or Immedia GlideCushion cotton/ polyester top, which can be combined with a nylon or disposable cover.

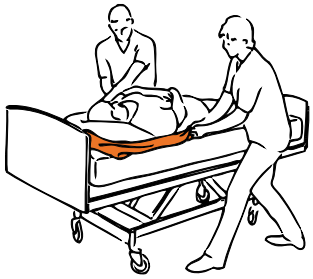
Immedia GlideCushion with cotton/ polyester top.

Immedia TurningMattress

PADDED TURNING MATTRESS

Immedia TurningMattress is suitable for turning in bed. It is placed in bed and the user remains on top of it. The ultra low friction inside may facilitate a user with reduced mobility to turn independently in bed. If necessary, one or two caregivers may assist the turning.

Immedia TurningMattress with cotton/ polyester top.



INTENDED USE

- Minimise friction under pressure points
- Move higher up in bed
- Turn in bed, either independently or assisted

POSITIONING – Sitting

Solutions for positioning when sitting.

Immedia **Swivel Cushions**

FOR TURNING IN SITTING POSITION

Immedia AutoTurn

The Immedia AutoTurn facilitates getting in and out of a car. Its low friction allows the user to slide and turn into the desired position in the car seat. This minimises strain and twisting of feet, knees, hips and back. AutoTurn is fixed around the car seat with a belt and buckle. Handles at the sides can be used to assist the user into place.

Immedia AutoTurn

Immedia EasyTurn

Immedia EasyTurn is a soft swivel cushion that makes it easier for the user to get in and out of a car or bed. EasyTurn is easy to apply and use.

Immedia EasyTurn

Immedia HandySwing Seat

Immedia HandySwing Seat

Immedia HandySwing Seat is a soft swivel cushion specifically suitable to support turning in and out of bed or chair. HandySwing Seat is softer and foldable which makes it easier to place under the user.

INTENDED USE

- In and out of a car
- In and out of bed

Immedia **OneWayGlide**

FOR CONTROLLED AND EASY POSITIONING

Immedia OneWayGlide is a cushion that allows sliding easily in one direction whilst resisting sliding in the other direction. It is suitable for users that slides forward when sitting. OneWayGlide facilitates independent or assisted positioning back in the chair whilst helping to prevent the user from sliding forward.

Immedia OneWayGlide is available in the following versions: Immedia OneWayGlide non-slip, Immedia OneWayGlide velour, Immedia OneWayGlide pad.

Immedia OneWayGlide non-slip is a tubular cushion with a non-slip outer material that grips to any surface. It can be combined with a cotton cover when necessary.

Immedia OneWayGlide velour is a tubular cushion with velour material. More comfortable to sit on, but needs to be used on a textile surface.

Immedia OneWayGlide pad is a one layer pad with velour top suitable for use directly on a textile surface.

Place the OneWayGlide in the chair just in front of the seat.

RECOMMENDED USE!

1. Using the Immedia OneWayGlide eases repositioning when the user slides forward in the wheelchair.

2. To move backwards in the wheelchair the user must lean forward, hold the armrest and push towards the backrest using her arms and, if possible, legs.

3. When the user is upright again, the unique design of the Immedia OneWayGlide will prevent the user from sliding out of the chair.

TIP!

If a user slides forward, it may be due to a poorly adapted wheelchair. Always assess the seat before using Immedia OneWayGlide.

Immedia OneWayGlide non-slip tubular cushion.

Immedia OneWayGlide velour tubular cushion.

Immedia OneWayGlide pad velour.

OneWayGlide Long

Immedia OneWayGlide Long is a long and open cushion with handles and velour top surface. The length allows for repositioning to be performed several times in one application.

The handles provide a good grip, allowing the caregiver to assist. Available in two options; with or without tie strings. The tie strings are used to tie the cushion to the wheelchair frame when necessary.

Immedia OneWayGlide Long with handles and tie strings.

INTENDED USE

- Positioning back in chair / wheelchair / day chair

TRANSFER – Sitting

Solutions for seated transfers between bed, wheelchair, chair, toilet, etc.

Immedia **PediTurn**

SWIVEL CUSHION FOR THE FLOOR

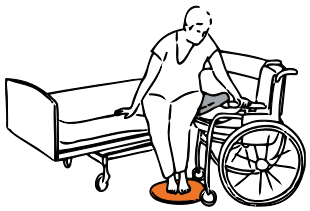
Immedia PediTurn is a swivel cushion that facilitates transfer between sitting positions, such as bed to wheelchair. It is used when the user cannot move their feet during the transfer.

Available in two options:

- Immedia PediTurn SOFT: a soft cushion suitable when the user is not wearing shoes. It has a non-slip surface on both sides to avoid sliding out of position.
- Immedia PediTurn HARD: a hard plate suitable when the user is wearing shoes.

Immedia PediTurn HARD

Immedia PediTurn SOFT



INTENDED USE

- Support moving feet during seated transfer
- Transfer between bed and wheelchair
- Transfer between wheelchair, chair, shower chair, toilet, commode
- Transfer in and out of a car

Immedia **Transfer Boards**

A WIDE RANGE OF SOLUTIONS FOR SEATED TRANSFERS

The transfer board is intended to bridge shorter gaps when performing seated transfers. The board's low friction upper surface allows the user to transfer independently or with assistance. Immedia Transfer Boards are used when transfering between bed and wheelchair / shower chair, between wheelchair / chair / toilet chair or to and from the car. All Transfer Boards have a non-slip surface on the underside. Combining a transfer board with a glide cushion provides even lower friction and is recommended when the transfer involves bare skin, for instance to and from a shower chair or toilet.

150kg

Immedia 3B-Board's length allows transfer across wider gaps.

250kg

Butterfly with GlideWing.

Immedia Butterfly

Immedia Butterfly is a long, wide and stable transfer board. It has cut outs for positioning against the wheel of a wheelchair and non-slip pads on the underside which allows for good positioning and avoids sliding out of place.

Immedia Butterfly GlideWing

Butterfly can be used with the special Butterfly GlideWing, which is mounted on the board. The GlideWing slides along the board and provides additional slide function.

Immedia 3B-Board

Immedia 3B-Board is a stable transfer board with a traditional curved shape. The board can be placed either curve forward or curve backward depending on the transfer situation and surrounding obstacles, eg: the wheel of the wheelchair.

RECOMMENDED USE!

1. Place the Immedia Butterfly close to the users seat, and slide the GlideWing under one seat bone.

2. If possible, the user holds on to the opposite armrest when she starts to slide towards the wheelchair. Use the Immedia Pediturn to ease turning.

3. When the transfer is complete, remove the Immedia Butterfly and engage wheelchair armrests and legrests.

TIP!

When transferring with a board, ensure the surface you are moving to is slightly lower and use gravity to make the transfer easier.

Immedia E-Board

Immedia E-Board is a thin and flexible transfer board that allows easier application and removal.

150kg

Immedia E-Board with wings.

E-Board with wings

Immedia E-Board with wings has wings along the sides, which can be bent up or down. This provides more sturdiness and stability. The upward wing is used to protect against the wheel of the wheelchair. Available in two lengths.

150kg

Immedia E-Board without wings.

E-Board Compact

A smaller and lighter board that is easily carried and suitable for the more active and independent user. Immedia E-Board Compact is available in two lengths.

Learn more …

… about how to use the transferboards. Our new animated film Transferboards – E-Board gives you useful instructions for your daily work.

Immedia Dolphin

Dolphin is a sturdy and stable transfer board uniquely designed for transfer to the toilet. The board has cut-outs for positioning against the wheel of the wheelchair and non-slip pads, which allows good positioning and avoids sliding out of place. The cut-out allows the user to remain on the board while on the toilet.

150kg

Immedia Dolphin is uniquely designed for transfer to toilet.

INTENDED USE

- Transfer from bed to wheelchair / shower chair
- Transfer in and out of the car
- Transfer between wheelchair, chair, toilet, shower chair, commode

Immedia **Glide Pads**

GLIDE PADS FOR EASY TRANSFER

Immedia Swan

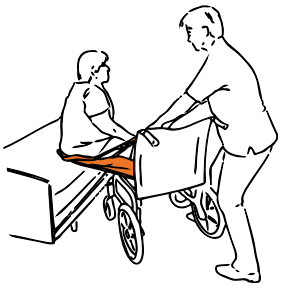
The Immedia Swan is an open glide pad with handles. It is suitable for transfer between bed and wheelchair or in and out of a car and can be used independently or in combination with a transfer board.

Immedia Swan glide pad with handles.

Immedia HandyTrans

Immedia HandyTrans is a short glide pad suitable for transfer between bed and wheelchair or for adjusting position in bed. It can be used independently or in combination with a transfer board. The optimal solution for a seated transfer in and out of car, is a combination of a transfer board and a Immedia HandyTrans.

Immedia HandyTrans gives the caregiver a good grip when transferring on a transfer board.



INTENDED USE

- Support transfer between bed, wheelchair, chair, etc
- Transfer in and out of a car
- Moving back / forward in chair / wheelchair
- Transfer wheelchair to toilet / showerchair

DESCRIPTION	WIDTH X LENGTH		ITEM NO.	SPECIFICATIONS

TRANSFER – Horizontal

Solutions for horizontal transfers between beds, bed to shower trolley, etc.

Immedia **2Move**

TRANSFER BOARD FOR HORIZONTAL TRANSFER

Immedia 2Move transfer board is used to bridge the gap and even out the height difference between two horizontal surfaces. It is used for horizontal transfer between beds, bed to shower trolley, bed to x-ray table, stretcher to bed, etc. It is simple to transport and store.

Immedia 2Move transfer board, incl. nylon cover.

Available in two lengths and widths

2Move transfer board is available in two lengths; short and long. The long model is available in three options; narrow foldable, narrow non-foldable and wide foldable.

The wide foldable board is suitable when the gap between the transfer positions is larger.

Low friction cover

Immedia 2Move is always used in combination with a low friction cover which slides around the board, minimising friction and facilitating the transfer. Four cover options are available.

Disposable cover in roll.

With Immedia 2Move a transfer between two horizontal surfaces is safe and comfortable both for the caregiver and the user.

RECOMMENDED USE!

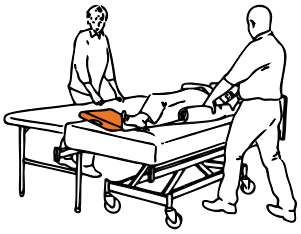
1. Place the Immedia 2Move under half the patient's body. Place the head and feet of the patient on the Immedia 2Move.

2. Now place the stretcher as close as possible to the bed. One caregiver tilts and pushes the patient towards the Immedia 2Move. A second caregiver pulls the patient towards the stretcher.

3. When the transfer is complete, remove the 2Move board.

TIP!

Use a sheet or a drawsheet between the Immedia 2Move and the patient to reduce shear and create handles.



INTENDED USE

- Bridges the gap when transferring between two supine positions
- Transfer between beds
- Transfer between bed and shower trolley
- Transfer between bed and stretcher, x-ray table, operating table

Immedia **TransferMattress**

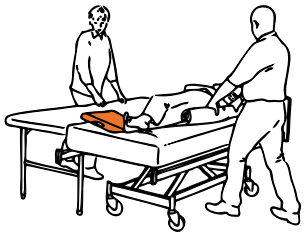
SOFT PADDED MATTRESS FOR HORIZONTAL TRANSFER

Immedia TransferMattress facilitates horizontal transfer between two supine positions, such as bed to bed, bed to shower trolley, bed to x-ray table, etc. It can also be used for turning in bed, for instance from "face up" to "face down". Immedia TransferMattress is made of a soft padded cotton/polyester material and available in two widths, 60 cm and 70 cm.

Combined with a cover

Immedia TransferMattress can be combined with a waterproof nylon cover or a disposable cover. Immedia TransferMattress should not be used if there is a gap between the two transfer surfaces.

The quilted TransferMattress provides a soft and comfortable horizontal transfer.



INTENDED USE

- Transfer between beds
- Transfer between bed and shower trolley
- Transfer between bed and stretcher, x-ray table, operating table
- Turning in bed

SUPPORT

Solutions for support,
mobilisation and transfer.

Immedia **Sling**

MULTIFUNCTIONAL TRANSFER AID

The Immedia Sling is a multifunctional transfer aid that can be used in several situations.

Immedia Sling with handles acts as an extension of the arms, allowing the caregiver to offer support and assistance whilst maintaining a good ergonomic position and grip, without encroaching on the user's personal space.

Sling is a flexible tool that can be used to support many different transfers such as, moving higher up in bed, transfer between sitting positions, etc.

Immedia Sling has 4 handles on each side and a non-slip material on the inside to secure the user during the transfer. The outside has a low friction surface to aid transfer and removal.

Immedia Sling is a flexible aid offering a number of different functions.

Immedia Sling with handles acts as an extension of the arms, allowing the caregivers to offer support and assistance whilst maintaining a good ergonomic position and grip.

RECOMMENDED USE!

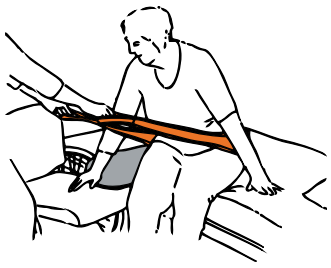
1. The Immedia Sling provides excellent handles for caregivers. Used with Immedia MultiGlide or similar low friction devices, you ensure a safe working environment when users need to be repositioned in bed.

2. Even with one caregiver, it is possible to reposition the user higher in bed using the Immedia Sling as shown.

3. With one or two caregivers, a user can be repositioned further back in a chair by moving the user slightly from side to side.

TIP!

When two caregivers are working together one should always give a precise command when to push or pull.



INTENDED USE

- Support moving higher up in bed
- Support transfer between bed, wheelchair, chair, etc
- Support stand up / sit down
- Moving back / forward in chair / wheelchair

Immedia **SmartMove**

SUPPORT PAD WITH HANDLES

Immedia SmartMove acts as an extension of the arms, allowing the caregiver to offer support and assistance whilst maintaining a good ergonomic position and grip.

SmartMove pad can be used to support and help transfer from sitting to standing, standing to sitting, to move higher up in bed or move back/forward in a chair. SmartMove provides the caregiver with a place to grip and to maintain a good working position. The inside has a non-slip material to help prevent sliding out of position during the transfer, whilst the outside has a low friction side to aid application and removal.

Immedia SmartMove has a non-slip material to help prevent sliding out of position.

INTENDED USE

- Support stand up / sit down
- Support moving higher up in bed
- Moving back / forward in chair / wheelchair
- Support transfer between bed, wheelchair, chair, etc

WASHING INSTRUCTIONS

Do not use fabric softener or bleach.

Immedia **BedString**

SUPPORTS SITTING UP IN BED

Immedia BedString with handles is mainly intended for the active user to support moving to a sitting position in bed. In the sitting position, the user may use it to lean themselves forward to allow easier application of a sling, positioning of pillows or for dressing. BedString has 8 handles, alternating right and left side of the string to enable the user to find a good grip.

Immedia BedString with 8 handles on alternating sides of the string.

Immedia **HandyGrip**

ADJUSTABLE GRIP TO AID TURNING IN BED

Immedia HandyGrip provides help with independent turning in bed. It can also be used when self transferring from wheelchair to bed. Soft, compact and easy to hide away. The adjustable buckle allows the length and position of HandyGrip to be varied, providing the user with a good grip in the required position.

Soft, compact and easy to use.

Do not use fabric softener or bleach.

SPECIAL SOLUTIONS

Solutions for specific situations and needs,
hospital environment and tight spaces.

Immedia **SlingOn**

A TRANSFER AID FOR APPLICATION OF LIFTING SLING AND POSITIONING

Immedia SlingOn is primarily designed for easy application of a hoist sling in bed without the need for logrolling or moving the user. SlingOn consists of two separate ultra low friction nylon slide sheets held together by snap buttons in the corners and it has handles along the sides. SlingOn is an ideal aid for users that needs frequent hoisting, heavy users, or users that should not be logrolled for application of a sling. In addition it can be used for all positioning in bed.

SlingOn is placed under the user using a simple folding technique, whether it is for the application of sling or for positioning. The hoist sling is then inserted between the two layers of SlingOn.

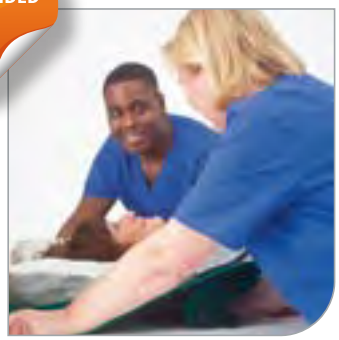
The ultra low friction facilitates sliding the sling in place underneath the user, and adjustment if necessary. When the hoist sling is in place, remove the top part of SlingOn.

Note: The user is always lifted in the sling, never in SlingOn. Always remove the top part of SlingOn before hoisting.

Immedia SlingOn is the optimal solution for insertion of a hoist sling without rolling.

When working with bariatric patients and narrow surfaces, logrolling patients with a hoist sling can be challenging. The Immedia SlingOn allows you to use hoist slings without logrolling the patient.

RECOMMENDED USE!



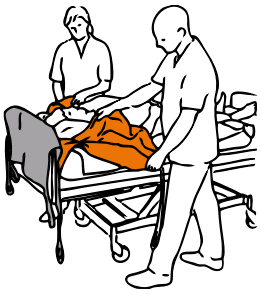
1. Roll up the Immedia SlingOn from the short side in 20-30 cm steps. Roll out the SlingOn underneath the user in stages. It is important to pull the SlingOn simultaneously.

2. When the Immedia SlingOn is in place, apply the hoist sling between the two layers of the SlingOn. The hoist sling is applied in the same way as the Immedia SlingOn. Pull from the head end towards the seat in small steps. When the hoist sling is in place, remove the top part of the SlingOn. The user can now be hoisted.

TIP!

Use the Immedia SlingOn as traditional slide sheets. The two parts are equipped with handles to make repositioning easy.

The Immedia SlingOn can also be applied from knee level and towards the head end.



INTENDED USE

- Application of a hoist sling without rolling
- Minimise friction under pressure points
- Turning
- Positioning
- Move higher up in bed

DESCRIPTION	WIDTH X LENGTH		ITEM NO.	SPECIFICATIONS
Immedia SlingOn	**CM**	**INCH**		MATERIAL: Nylon

~ Medium	80 x 170	31.5 x 66.9	IM438	

WASHING INSTRUCTIONS

Can be wiped with disinfectant
Do not use fabric softener or bleach.

Immedia **WiseMover**

IN-BED POSITIONING FOR HOSPITAL ENVIRONMENT

Immedia WiseMover is a specially developed in-bed solution for bedridden users that require frequent positioning and transfer, for instance users in an ICU environment. WiseMover stays fixed to the bed; the slide sheets are folded away in the case at the head end and are folded in and out under the user when required.

When rolled out under the user it can be used for turning, positioning and horizontal transfer. It also facilitates inserting an x-ray cassette when the user needs to stay in bed.

Immedia WiseMover can be hidden inside the case at the head end of the bed and be folded in and out under the user when required.

INTENDED USE

- Minimise friction under the pressure points
- Turning
- Positioning
- Horizontal transfer
- Inserting x-ray cassette
- Inserting lifting sling

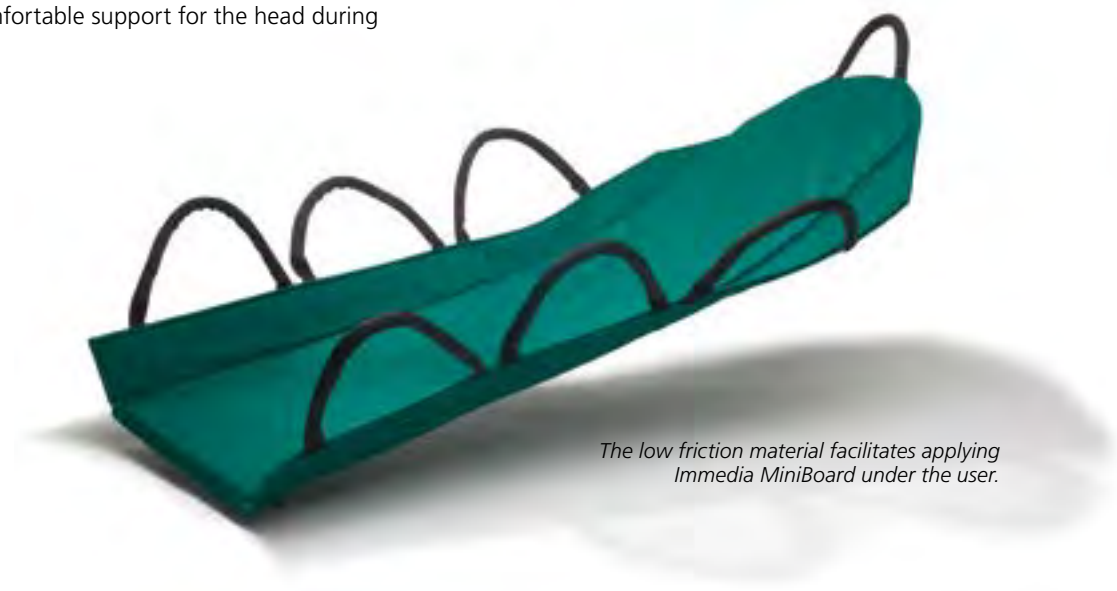
Immedia **MiniBoard**

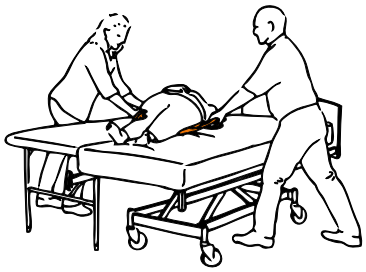
SOFT TRANSFER STRETCHER

MiniBoard is suitable for transfer between bed and operating table, turning and positioning in bed and when lifting from the floor. The board in combination with the low friction material makes it easier to insert under the user.

There are two options with head support which allow safe and comfortable support for the head during transfer.



The low friction material facilitates applying Immedia MiniBoard under the user.



INTENDED USE

- Horizontal transfer
- Lift from the floor

DESCRIPTION	WIDTH X LENGTH		ITEM NO.	SPECIFICATIONS

WASHING INSTRUCTIONS
Can be wiped with disinfectant
Remember to remove the stuffing and the plastic plate before washing.

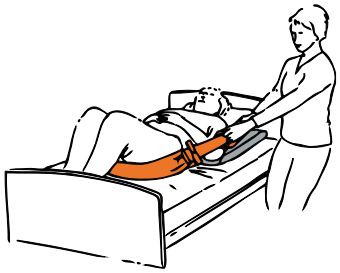
Immedia **OneManSling**

THE SINGLE CARER'S COMPANION

Immedia OneManSling makes it possible for one caregiver to move a user higher up in bed. Fasten the OneManSling using the loop at one side of the head end of the bed and by using the leverage created by the sling and the slide cushion, using minimal effort, move the user higher up in bed. To minimise friction, place a slide sheet under the user's pressure points, primarily shoulders and hip section.

The construction of OneManSling, with a strap and a slide cushion, together with a MultiGlide slide sheet, gives very good leverage for effortless movement.

Immedia OneManSling makes it possible for one caregiver to move a user higher up in bed.



INTENDED USE

- Assisted move higher up in bed
- Assisted move legs in and out of bed

DESCRIPTION	WIDTH X LENGTH		ITEM NO.	SPECIFICATIONS

WASHING INSTRUCTIONS

Do not use fabric softener or bleach.

Immedia **Positioning Wedge**

SUPPORT AND POSITIONING CUSHIONS WITH NON-SLIP MATERIAL

Immedia Positioning Wedge supports the user on the side after turning, when resting or when performing hygiene or wound care, saving the caregiver from maintaining a static holding position. The Positioning Wedge can be combined with 4WayGlide System, SatinSheet System, MultiGlide or other slide sheets. The cover is a non-slip Polyurethane material that helps to keep the Positioning Wedge in place independent of surface material.

INTENDED USE

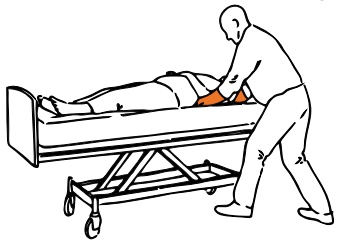
- Support static positioning
- Resting
- Care and personal hygiene
- Can be used alone or in combination with other positioning aids

The Immedia Positioning Wedge have unequally angled sides, turn the wedge around and use the angle that fits best for the situation.

Immedia **MultiGlide Glove**

MULTIFUNCTIONAL AID FOR SMALL TRANSFERS

Immedia Multiglide Glove can be used in many different manual handling situations. The glove makes it easier to place the hands between the user and mattress or cushion. Small re-positioning adjustments, movements and smoothing out the bed sheets are common activities for which the gloves are very useful, and will provide an improved solution for the user and the caregiver. MultiGlide Glove can also be used for skin tension release.



INTENDED USE

- Positioning
- Small re-positioning adjustments
- Hand check of anti-decubitus cushions and mattresses

Immedia **X-Ray Solutions**

TO EASE THE X-RAY PROCESS FOR BEDRIDDEN PATIENTS

Immedia Thorax SlideSecure

Immedia Thorax SlideSecure facilitates the insertion of an x-ray cassette under a bedridden user. It is fixed to the head end of the bed so that it is easily available. Thorax SlideSecure has been developed for bedridden patients that need frequent x-ray examinations.

Immedia Thorax SlideSecure

Immedia Mole X-ray glideboard facilitates placing x-ray cassette under patient.

Immedia Mole

Immedia Mole X-ray glideboard makes it easier to position an x-ray cassette under a user in bed. Mole consists of two separate boards, held together at the front end so that the x-ray cassette can be placed between the boards. The top board is transparent to assist in controlling the position of the x-ray cassette. Easily slide the board under the user until it is placed in the desired position.

Immedia Scanner ArmSupport

Scanner ArmSupport is a tool for patients who have difficulty in placing and holding their arms in position during x-ray and scanning. Scanner ArmSupport makes it more comfortable for the patient and minimises risk of movement during the x-ray or scanning to give improved picture quality.

Place and support the arms during x-ray and scanning.

ACCESSORY

Immedia Thorax SlideSecure bag

Immedia Thorax SlideSecure glide bag can be combined with Thorax SlideSecure or Mole for even easier application of the x-ray cassette.

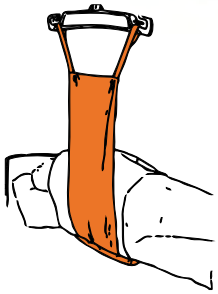
Immedia **HipTurner**

SPECIAL AID FOR TURNING AND STATIC SUPPORT IN BED

Immedia HipTurner is especially designed for turning a patient and supporting them in a static position on their side, while also creating space for placing a bed pan under the patient, for personal hygiene, ulcer care or dressing. HipTurner makes it possible for the caregiver to maintain a good working position thus minimising strain.

Turning with help of Immedia HipTurner can be performed manually or in combination with a hoist.

Immedia HipTurner supports turning and static positioning of the patient on one side.



INTENDED USE

- Turning in bed
- Support static positioning on one side
- Facilitate placing bed pan, personal hygiene, ulcer care or dressing
- Can be used in combination with hoist

SIT TO STAND

Solutions for active
sit to stand transfers.

Etac Turner

PATIENT TURNER WITH STANDING SUPPORT

Etac Turner is a patient turner with handles that facilitates transfer between seating positions. The caregiver can maintain an ergonomic working position whilst the user is activated and moves to a standing position.

Turner is compact and easy to position when required. The low footplate, only 13 mm high, makes it easy for the user to place their feet on it. The non-slip surface on the footplate offers additional security. The only adjustment necessary is the height of the leg support and the handle. When ready, the transfer can be performed safely whilst the caregiver and user can maintain eye contact and communication.

Etac Turner is a practical aid which facilitates transfer between seating positions.

Etac Turner is available in two models, Oval handle for horizontal grip or U-handle for vertical grip.

INTENDED USE

- Sit to stand transfer platform
- Transfer bed to wheelchair / shower chair
- Transfer wheelchair to toilet
- Transfer chair to wheelchair / shower chair

Molift Raiser

TRANSFER PLATFORM FOR ACTIVE TRANSFER.

Molift Raiser works as a sit to stand transfer platform. It is designed to safely activate the user whilst maintaining the best possible ergonomic moving and handling conditions for the caregiver.

Unique features

The unique leg support is designed to be easily adjusted with one hand. Similarly, wheel locks (right or left) will lock both wheels simultaneously providing a safe braking solution in space limited environments. The fine grain finish of the foot-plate provides a non-slip surface and the handle offers many different grip possibilities. These features enable the user to feel safe throughout the entire transfer.

Accessories

Molift soft handle
If the user has difficulty grasping the handle, the soft handle can be used to help the user reach all the way.

Molift Raiser Strap
A safety strap can provide support around the back or hips when standing up.

Molift Raiser Strap+
When users need to be assisted this can be done by one or two caregivers using the Molift Raiser Strap+.

INTENDED USE

- Sit to stand transfer platform
- Transfer bed to wheelchair / shower chair
- Transfer wheelchair to toilet
- Moving back / forward in chair / wheelchair
- Transfer chair to wheelchair / shower chair

Service **information & procedures for delivery and inspection**

FIRST INSPECTION

- Is the packaging intact?
- Read the label on the packaging and check the article no. and product description
- Check that Short Instruction is enclosed – updated User Manual can be downloaded from www.etac.com or contact the local distributor.
- Check the label on the product – does it include article no., product description, lot/batch no., cleaning instructions and supplier name?

PERIODIC INSPECTION

- Make sure that your Manual Transfer system always is in a perfect condition.
- After wash – always check materials, stitching, handles, buckles.
- If the product shows signs of wear and tear, it must be removed from service immediately.
- Lot no/Batch no:

x	x	x	x	x	x	x	x	x	x
Production year		Running number							

VISUAL INSPECTION/CHECK THE PRODUCT

Ensure that the materials, seams, stitching, handles, buckles are intact/faultless.

MECHANICAL LOAD OR STRESS/TEST HANDLES

Pull hard in the handles in opposite directions and inspect the material, seams and stitching.

TEST BUCKLES

Lock the buckle and pull in opposite directions, inspect the buckle and the stitching.

STABILITY TEST

Try to bend the product and verify that it feels firm, stable and solid.

TEST LOW&HIGH FRICTION

Place the product on a firm surface or a bed, place your hands on the material and test the friction by pushing your hands down into the material.
Low friction – slides effortlessly
High friction – no sliding/moving

ALWAYS CHECK

Manual transfer aids with handles, straps and buckles:

Manual transfer aids for sitting and horizontal transfer:

Manual transfer aids with high or low friction:

The product can be scrapped in accordance with national regulations.

Read the User Manual

If in doubt, please contact Etac Customer Service or local distributor for more information and guidance.
For more information about training and the use of these products, please contact the Etac transfer experts – **www.etac.com**. There you can also find this page as a PDF.

A wide range of possibilities

Etac offers a wide range of products which help people with daily living routines regardless of physical circumstances. The products all reflect our creating possibility philosophy. Safety, function, quality and design are of highest priority. You find all information about our products at etac.com.

MANUAL WHEELCHAIR AND SEATING SOLUTIONS

All Etac wheelchairs are designed to meet the needs of many different users as well as care requirements. There are several cross-folding and rigid frame models to choose from – all with many adjustment possibilites and a wide range of accessories. For the user, our wheelchairs guarantee the best possible seating comfort, userfriendliness and excellent manoeuvring.

The Cross 5 wheelchair combines maximum comfort with optimum functionality, designed for many different users. Read more about Etac Cross 5 and the other wheelchairs at etac.com.

TRANSFER SOLUTIONS

Etac offer a wide range of transfer aids, characterized by high quality in functionality, durability and design. Immedia, our manual transfer product range ensures safe and comfortable transfers. The smooth products remove friction points and facilitate weight shifts. They also facilitate using natural movement patterns and the transfer can be performed with easiness and dignity, for both caregiver and care recipient.

Molift is our high quality product range of hoists and slings developed to ensure safety, dignity and comfort. The objective is to provide the best and most secure care, avoid heavy hoisting situations which can put caregiver's back at risk and provide the healthcare sector with the most cost effective solutions.

Molift RgoSlings are designed to distribute weight and pressure evenly for maximum comfort.

Molift Smart 150 is light, foldable and transportable without tools.

BATHROOM COMFORT AND DAILY LIVING SOLUTIONS

Etac products for daily living are designed to alleviate stress and strain on muscles and joints, making it easier for the user to continue performing the daily tasks, such as gripping, turning, eating, writing and getting dressed. Etac also provides safe solutions for bathing and toileting, which give a high sense of comfort. The wet environments put high demands on durability and quality. All products have constructions and materials that can handle the strain and provide long life time.

Showering is one of daily life's little pleasures. It also creates time for reflection. The foldable Relax shower seat allows you to simply sit back and enjoy the feeling of well-being.

POWER WHEELCHAIRS

Etac power wheelchairs offer comfort, quality and versatility. They are the most advanced multifunctional power wheelchairs. Etac power wheelchairs have a height adjustment span which is greater than any other wheelchair. Our power wheelchairs also have a structurally integrated transportation securement system.

Discover the future of independent powerchair living with the intelligent Etac E800 range.

PEDIATRIC EQUIPMENT

There is no question that independence is essential to a child's development. Less able children are no different. Just like everyone else, they too want to be able to do things for themselves and start to discover who they really are. Through the Etac subsidary R82 we offer the best in a complete assortment specially designed for children to help them expand their horizons.

The Rabbit is secure, reliable and easy to adjust, meeting the needs of the individual child. It provides children with the opportunity to explore and enjoy new and exciting adventures.
